Summary

Hands-on, successful Software Engineer with decades of verifiable success leading teams in delivering appropriate technology solutions for web and mobile products.

Comprehensive knowledge of platform development, enterprise architecture, agile methodologies, cloud services, and web-based applications. Innovative change agent with a unique mix of high-level technology direction and deep technical expertise.

Work experience

Senior Developer

National Bank of Kuwait

Dec 2019 - present

- Proudly worked and officially released Weyay app, the first Kuwait Digital Bank developed using native languages Swift and Kotlin.
- Work on Banking Digital Transformation to create a smart banking platform in all GCC.
- Modify existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance.
- Consult with engineering staff to develop specifications and performance requirements, or resolve customer problems.
- Prepare reports or correspondence concerning project specifications, activities, or status for management.
- Manage tasks on Microsoft Azure board and work closely with third party vendors, integrate and develop SDK, and work on bug fixing and improvement.

React Native Developer

Eurisko Mobility, Al Rajhi Bank, Saudi Arabia

Feb 2019 - Jul 2019

- Work on Al Rajhi Retail mobile application using React Native technology, Redux, Axios, and React Hooks.
- Develop unit testing using Jest technology for React.
- Integrate CI/CD such as Jenkins, Bitbucket, Jira and SonarQube technologies.
- Integrate RESTful API for mobile core banking services.

Senior iOS Developer

Eurisko Mobility, Adma

Nov 2018 - Nov 2019

- Work on native iOS mobile applications using latest Swift language and create Xcode project and file templates to help team members using a standard and unified code.
- Work on Saradar Bank mobile application and create a dynamic content integrated with third party APIs for the KYC onboarding feature.
